Cloud Readiness Assessment
Making you Cloud Ready

aws PARTNER Premier Tier Services

Cloud migration involves various IT infrastructure changes, operational readiness and a strategy that is aligned to business goals. You must be able to optimize cloud for costs, agility, performance and speed.

Umbrella focuses on a well-rounded Migration approach that encompasses security, operations, business needs, people and process. This helps you set migration objectives, understand adaptability, assess cloud security needs, launch a migration model and define cloud costing. As a first and firm step, we have put together a Cloud Readiness Assessment that helps you evaluate the components for migration.

Migration Readiness Assessment

Depending on where you are in your Cloud journey, we help you assess your migration needs within 4-8 weeks

Workshops

- Review company migration objectives & organisational readiness
- Assimilate inventory on infrastructure, licensing and applications
- Conduct AWS Immersion Days

Review

- Assess Applications, Databases, Security, Network, and Systems
- Analyse transition requirements, dependencies and adaptability
- Determine migration velocity and timing

Outcomes

- Total Cost of Ownership (TCO) & RoI Report
- Summary of existing strengths and focus & help with decision making
- Proposal and roadmap for workload migration
